

Industrial Couplings and Accessories

U.S. Hose & Coupling carries a full line of couplings to assemble on our stock hoses. These couplings include Cam and Groove, Air fittings, Ground joints, Suction couplings, Bauer® fittings, Combination nipples, ball valves, strainers and many more. With stock in these fittings it makes for a fast assembly that can ship to you or your customer that day! U.S. Hose & Coupling is always looking to improve our assemblies and methods of attachment as well. We have the ability to swaged, internally expand, band and crimp most of these couplings. Please call us to check stock in the coupling of your choice!

Acme Strapbinder Clamps and Strapping Material

Acme Strapbinder® has been providing quality strapping and banding for many years. U.S. Hose & Coupling is proud to use and distribute the entire product line Acme Strapbinder® has to offer. These products include Bands, Buckles, Tools, Plastic strapping, Dispensers, preformed band clamps, punch-lok style and smooth seal and many more products! Please call U.S. Hose & Coupling for your strapping and banding needs.

Campbell Products

We are proud to carry the full line of Campbell® products. This includes their Ground Joints and Chem-Joints! With the technology that Campbell brings to the industrial hose world, you can be assured that when U.S. Hose & Coupling makes an assembly with the Campbell® stem and ferrule that there will be no leaks or hose failure due to end connections. Whether it is your common Jack Hammer hose assembly, Petroleum suction assembly or high pressure Air Drill hose assembly U.S. Hose & Coupling has the crimped end fitting configuration ready to ship! Due to our customers response we are crimping hose assemblies more and more everyday! Please call and check out our stock in the fitting or crimp sleeve that your customer is looking for today!
