

## *CBC Flipper Pulley*

Specifically designed for conveyor systems operating in load zones, the Flipper Pulley is outfitted with durable rubber flippers, to redirect product back onto the belt, minimizing spillage.

**High-Strength Construction:** Made with CFW CBC 4140 HTSR steel for exceptional strength and durability in demanding conveyor applications.

**High-Speed Capability:** Engineered for belt speeds exceeding 400 FPM, ensuring smooth performance without loss of belt contact.

**Reduced Noise & Vibration:** Constant belt engagement minimizes operational noise and vibration.

**Superior Abrasion Resistance:** Special contact bar materials deliver extended wear life and resistance to abrasive materials.

**Anti-Static Options:** Anti-static rubber flippers available on request for dust-sensitive or hazardous environments.

**Optimized for Enclosed Systems:** Designed for enclosed belt conveyor systems, reducing spillage and improving containment.
