SPLIT PILLOW BLOCKS

SPLIT

FEATURES OF THE SPLIT HOUSING PILLOW BLOCK:

SAF	Cast Iron
SAFD	Ductile Iron
SAFS	Cast Steel
SDAF	Cast Iron for exceptionally heavy loads.
SDAFS	Cast Steel for heaviest industrial applications, where severe loads and shocks are commonly found.

Triple-seal rotating rings: seal out foreign matter. . . seal in oil or grease.

Large drain hole under triple-seal, for proper lubricant flow. Centerline (W-33) bearing lubrication for penetration to all work surfaces.

Outward flow flushes out foreign matter and moisture with old lubricant.

Easy installation and inspection.

For cylindrical or adapter mounting.

Self-aligning spherical roller bearings compensate for installation mis-alignment, movement of mounting bases, shock loads, thrust loads, or shaft mis-alignment.

Extra heavy foot pad . . . smooth surfaces for better bolt seating. Four bolt base and cap.

Stabilizing rings at no extra cost for "fixed" bearings.

Cap and base accurately aligned by dowel pins at the start of manufacture.

With Miether Split Housing Pillow Blocks you receive quality housings for longest bearing life, experienced design and engineering service to meet your specifications.

HOW TO ORDER:

- When you order SAF 22216 you receive;
1 SAF 216 Housing (Housing, seal rings and stabilizing ring).
1 No. 22216 Bearing.
- 1 No. AN 16 Locknut, 1 No. W 16 Lockwasher.
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
SAF - Cast Iron SAFD - Ductile Iron
SAFS - Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

HOW TO ORDER:

- When you order SAF 22516 you receive;
1 SAF 516 Housing (Housing, seal rings and stabilizing ring).
1 No. 22216 K Bearing.
- 1 No. SNW 16 Adapter (Sleeve, Locknut and Lockwasher).
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
SAF - Cast Iron SAFD - Ductile Iron
SAFS - Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

HOW TO ORDER:

- When you order SAF 23024 K you receive;
1 SAF 024 K Housing (Housing, seal rings and stabilizing ring).
1 No. 23024 K Bearing.
- 1 No. SNW 3024 Adapter (Sleeve, Locknut, and Lockwasher).
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
 - SAF - Cast Iron SAFD - Ductile Iron
 - SAFS - Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

All housings come with stabilizing ring. Use for fixed, discard for float. Use only one "Fixed" bearing per shaft.

HOW TO ORDER:

- When you order SDAF 22220 you receive;
1 SDAF 220 Housing (Housing, seal rings and stabilizing ring).
1 No. 22220 Bearing.
- 1 No. AN 20 Locknut, 1 No. W 20 Lockwasher.
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
SDAF - Cast Iron SDAFD - Ductile Iron
SDAFS - Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

HOW TO ORDER:

- When you order SDAF 23156 you receive;
1 SDAF 3156 Housing (Housing, seal rings and stabilizing ring).
- 1 No. 23156 Bearing.
- 1 No. N 056 Locknut, 1 No. P 56 Lockplate.
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
 - SDAF Cast Iron
 - SDAFS Cast Steel
 - SDAFD Ductile Iron

HOW TO ORDER:

- When you order SDAF 22520 you receive;
 - 1 SDAF 520 Housing (Housing, seal rings and stabilizing ring).
 - 1 No. 22220 K Bearing.
 - 1 No. SNW 20 Adapter (Sleeve, Locknut and Lockwasher).
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
 - SDAF - Cast Iron SDAFD - Ductile Iron
 - SDAFS - Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

All housings come with stabilizing ring. Use for fixed, discard for float. Use only one "Fixed" bearing per shaft.

HOW TO ORDER:

- When you order SDAF 23152 K you receive;
1 SDAF 3152K Housing (Housing, seal rings and Stab Ring).
1 No. 23152 K Bearing.
- 1 No. SNP 3152 Adapter (Sleeve, Locknut, and Lockwasher).
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
 - SDAF Cast Iron SDAFD Ductile Iron
 - SDAFS Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

HOW TO ORDER:

- When you order SAW 23224 you receive;
1 SAW 224 Housing (Housing, seal rings and Stab Ring).
1 No. 23224 Bearing.
1 No. AN Locknut, and 1 NO. W 24 Lockwasher.
- If you order a closed housing the proper end plug is included.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
SAW Cast Iron
SAWS Cast Steel
- All Miether housings have four bolt cap.
- The sizes listed below are standard items.

**LABYRINTH SEAL
WITH OPTIONAL FLINGER**

OPTIONAL FRICTION SEAL

Unless your order designates otherwise, all Miether flange cartridges are provided with labyrinth seals, designated by the standard prefix "FCL" in the complete flange unit.

Optional equipment may be ordered simply by altering the prfixes as follows:

LABYRINTH SEAL WITH FLINGER ACCESSORY.....prefix FCLF
FRICTION SEAL.....prefix FCS

MIETHER BEARING PRODUCTS, INC.

PRECISION ENGINEERED FOR
OUTSTANDING QUALITY

FLANGE CARTRIDGE BLOCKS

FLANGE

FEATURES OF THE FLANGE CARTRIDGE BLOCK:

FCL	Cast Iron with standard Labyrinth grooves.
FCS	Cast Iron with friction seal.
FCLF	Cast Iron with standard Labyrinth groove and flinger accessory.

Here, at last, is a flange cartridge designed from the word "go" with special applications in mind.

OPTIONAL FLINGER OR FRICTION SEAL -- An exclusive Miether design, the flinger provides an added safeguard where product-purity is your concern. It is available with all orders for labyrinth seals. Where preferred, friction seals are also available.

ADAPTABILITY -- In sizes to 8-inch (larger on request), these flange cartridge blocks can be adapted to take all series of spherical roller bearings. Precision drilled end plates and cartridge housings are interchangeable.

****** SPECIAL NOTE ******

In the Flange Cartridge housings, the seals are actually machined into the end plates and cartridge. To replace the "seals" in a flange housing requires the replacement of either the end plate or cartridge.

HOW TO ORDER: CYLINDRICAL MOUNT

- When you order FCL 22217 you receive;
1 FCL 217 Housing.
1 No. 22217 Bearing.
1 No. AN 17 Locknut, 1 No. W 17 Lockplate.
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
FCL - Labyrinth Seals FCLF - Labyrinth seals
FCS - Friction Seals with Flinger

HOW TO ORDER: ADAPTER MOUNTED

- When you order FCL 22517 you receive;
1 FCL 517 Housing.
1 No. 22217-K Bearing.
1 No. SNW 17 Adapter (Sleeve, Locknut, and Lockwasher).
- All housings include stabilizing ring, either use or discard.
- Always specify shaft size when ordering.
- Housing styles include;
FCL - Labyrinth Seals FCLF - Labyrinth seals
FCS - Friction Seals with Flinger

**STANDARD COFIGURATIONS FOR
SOLID STEEL PILLOW BLOCKS:**

DESIGNATE;

- NE.....Non-Expansion End
- CI.....Cast Iron Closed
- E.....Expansion End
- L.....Labyrinth Seals
- S.....Oil Seals

SOLID STEEL PILLOW BLOCKS

SOLID

FEATURES OF THE SOLID PILLOW BLOCKS:

Completely adaptable to any industrial application.
Available for all series of spherical roller bearings.

Precision drilled end plates and housings for perfect interchangeability. Take any lubrication system... center grooved housings for universal centerline lubrication; end caps have second connection for side lubrication.

Labyrinth or Oil Seal.
Both end plates removable for easy bearing installation, or adjustment.

Fit any shaft arrangement because they are compactly built. Precision engineered, one-piece construction with reinforcing center-rib to withstand severe shock loads.

Quality materials: Body made of stress-relieved SAE 1030 Cast Steel; caps made of close-grained cast iron.

Uniform wall thickness eliminates weak spots.

True alignment in every critical dimension means you can reverse or replace pillow blocks without loss of alignment.

MIETHER BEARING PRODUCTS, INC.

**PRECISION ENGINEERED FOR
OUTSTANDING QUALITY**

HOW TO ORDER:

- When you order MMW 22518 NEL you receive;
1 MMW 518 Housing with Labyrinth Seals, non expansion.
1 No. 22218 K Bearing.
- 1 No. SNW 18 Adapter (Sleeve, Locknut, and Lockwasher)
- These housing come either expansion for float applica or
non-expansion for fixed applications. Indicate by:
E - For Expansion NE - For Non Expansion
- Always specify shaft size when ordering.
- Use only one NE - Non-Expansion housing per shaft.
- If you want Oil Seals substitute letter S for L. Oil seals supplied at additional cost.
- If your order specifies "one end closed" you receive the necessary end plate.

PRECISION ENGINEERED FOR
OUTSTANDING QUALITY

LOCKNUTS..LOCKWASHERS..ADAPTERS

ADAPTERS

LOCKNUTS, LOCKWASHERS, ADAPTERS:

- ◆ Locknuts and lockwashers are used to secure bearings to shafts, and also to hold gears, belt pulleys and other machine parts.
- ◆ Each piece is accurately made to assure square fit and trouble-free service.
- ◆ The adapter allows a wide range of shaft diameters and makes it unnecessary to heat the bearing or use a press when mounting.
- ◆ NO and WO series as well as AN, N and W series as standard.
- ◆ The same engineering know-how and manufacturing care go into adapter assemblies that go into the pillow blocks and bearings.
- ◆ A large stock of sizes is carried for fast delivery to you. In both English and Metric shaft sizes.
- ◆ Consult us for your special needs in locknuts, lockwashers and adapter sleeves.
- ◆ Locknuts in stock to 18 1/2" shaft sizes.

HOW TO ORDER:

- When you order an SNW 16 you receive;
1 S 16 Adapter sleeve.
1 AN 16 Locknut.
1 W 16 Washer.
- Unless otherwise specified these comes as an assembly.
- Always specify shaft size when ordering.

- 1). Prefix W designates lockwasher, prefix P designates lockplate.
- 2). Consult us for availability of sleeves for other shaft sizes.
- 3). Sleeves S 3068, and larger have Acme Threads, General Purpose Class 3 G.

HOW TO ORDER:

- When you order an SNW 113 you receive;
1 S 113 Adapter sleeve.
1 N 13 Locknut.
1 W 13 Washer.
- Unless otherwise specified these comes as an assembly.
- Always specify shaft size when ordering.

1). The last two digits of the bearing number are referred to as the bore number. These two digits multiplied by 5 equal the bore size in millimeters.
Example: 22217, size is 17 x 5 = 85mm.

Note: These nuts and washers are used for all bearing series except the following, for which the light section nuts and washers are required;
230, 231

REMOVAL SLEEVES

HYDRAULIC NUTS

HYDRAULIC ADAPTERS

HYDRAULIC SECTION

HYD.

HYDRAULIC ADAPTERS, REMOVAL SLEEVES, AND NUTS:

- ◆ Hydraulic adapters are used to assist in the removal of the bearing. Oil injection aids in the release of the bearing from the tapered adapter sleeve.
- ◆ Hydraulic removal sleeves are used to aid in the removal of the adapter sleeve from the bearing and the shaft.
- ◆ Hydraulic nuts were designed to facilitate the mounting of bearings with tapered bores on tapered adapter sleeves.

HYDRAULIC ADAPTERS

Fig.1

Fig. 1 Shows a tapered adapter that has been modified for oil injection. Oil injection facilitates the dismounting of the bearing. The locknut is loosened, not completely removed, and oil is injected through the threaded connection. The pressurized oil travels through a circumferential groove machined into the sleeve's O.D. Oil distribution and pressure will overcome the frictional force between the bearing and sleeve allowing the bearing to slide off the adapter. American and Metric adapters can be ordered with hydraulic modification.

***For a hydraulic SNP 3176 x 14, order as a HSNP 3176 x 14**

***For a hydraulic H 3176 x 360mm, order as H 3176 HG x 360**

HYDRAULIC REMOVAL SLEEVE

Fig.2

Fig. 2 Shows a removal sleeve that has been modified for oil injection. The removal sleeve has to overcome frictional forces between the bearing and tapered sleeve, and between the sleeve and shaft. To accomodate this , circumferential grooves are machined into the sleeve O.D. and I.D. . O.D. and I.D. grooves are accessed by separate threaded connections. American and metric sleeves can be modified for hydraulic removal as follows:

- *A hydraulic SK 156 x 260mm would be ordered as a SK 156 HG x 260.**
- *An AH 3156 x 280 would be ordered as a AOH 3156 x 280mm.**

HYD.

HYDRAULIC NUTS

Hydraulic nuts were designed to facilitate the mounting of bearings with tapered bores on tapered adapter sleeves. A hydraulic nut is a steel ring that threads onto the adapter sleeve. The ring has an annular groove machined into one side to accept a circular piston. O-rings on the piston O.D. and I.D. form a seal between the piston and ring. As oil is injected into one of the two G 1/4" BSP connections, the piston drives the bearing onto the adapter sleeve to obtain the proper bearing clearance.

SEALS, TACONITE SEALS, AND END PLUGS:

- ◆ Labyrinth triple-seal rotating rings: seal out foreign matter... seal in oil and grease
- ◆ Taconite seals are a special auxiliary seal featuring 3 seals in one for extremely dirty, dusty, abrasive and wet environments. The taconite seal can be supplied with either a lip type oil seal or a V type v-ring seal.
- ◆ End plugs come in either a rubber or steel configuration.

SEALS, TACONITE SEALS, END PLUGS

SEALS

Available Seal Configurations:

TRIPLE SEAL RING:

- Standard seal on split pillow blocks.
- One-Piece rotating labyrinth seal.
- Close running tolerance between shaft and housing surfaces.
- Provides protection from contaminants.
- Provides grease or oil retention.

TRIPLE SEAL RING W/O-RING:

- O-Ring provides extra sealing between shaft & seal ring.
- One-Piece rotating labyrinth seal.
- Close running tolerance between shaft and housing surfaces.
- Provides protection from contaminants.
- Provides grease or oil retention.

SHROUD:

- Provides protection for inner seal.
- Purgeable grease cavity to flush out contaminants.

DROP-IN END PLUG:

- Contact fit to close off housing.
- Available in rubber or metallic for SAF housings, metallic only for SDAF housings.

TACONITE SEAL (TER):

- Special auxillary seal featuring 3 seals in one for extremely dirty, dusty, abrasive and wet environments.
 - 1) Outboard contact seals on shaft.
 - 2) Purgeable grease cavity to flush out contaminants.
 - 3) Inboard felt seal.
- Drop in replacement for LER, and ER seal.

TACONITE SEAL (TERV):

- Special auxillary seal featuring 3 seals in one for extremely dirty, dusty, abrasive and wet environments.
 - 1) Outboard v-ring seal on carrier and rotates with shaft.
 - 2) Purgeable grease cavity to flush out contaminants.
 - 3) Inboard felt seal.
- Drop in replacement for LER, and ER seal.

MIETHER BEARING PRODUCTS, INC.

PRECISION ENGINEERED FOR
OUTSTANDING QUALITY

Non-Standards and Specials

Miether's product line consists of bearing housings made to industry standards and bearing accessories made to American Bearing Manufacturer Association (ABMA) specifications.

However, many of the application problems in industry today cannot be solved with standard hardware. Thus the need for a manufacturer who can build what is needed instead of what is on the shelf.

Miether has the engineering expertise and the production machining capability to modify a standard housing and casting with such features as under/over size bore fits, extra float, milled feet, thermocouple taps, vibration monitor taps, non-standard centerline heights, crossover holes and oversize drains for oil circulation systems, predrilled dowel holes, and special paints.

If Miether does not have a standard casting pattern, we can quote you a unique casting per your print.

Miether has produced journal bearings using bronze sleeves in steel housings, or housings of aluminum for such use as rail car bearings.

If your requirement is non-standard or special, call Miether Engineering Department.

TECHNICAL INFORMATION

How To Order Replacement Bearings

Ordering the correct replacement bearing is a critical task - but one that is not difficult if you take time to gather the right information. Just follow these steps.

- First - IDENTIFY - the type of bearing you need to replace.
 - Ball Bearing - Single Row, Double Row, Angular Contact
 - Roller Bearing - Cylindrical, Spherical, Tapered
 - Thrust Bearing - Ball or Roller
 - Mounted Unit - Flange, Block, Cartridge, Take-up
 - Super Precision - Angular Contact Ball, Cylindrical Roller, Ball Screw Support.

- Second - LOCATE - the identification number on the bearing.
 - Bearing identification numbers are usually located on the inner ring face, outer ring face or bearing O.D. Sealed bearings may have the number marked on their seal caps. Mounted units are identified by a number tag fastened to the unit or by a housing number tag fastened to the unit or by a housing number cast into the housing cap.

- Third - MEASURE - if you need to.
 - If a bearing identification number is not legible, you will need to determine the following:
 1. Inner ring bore (inside diameter)
 2. Outer ring outside diameter
 3. Inner width and outer width (these may be different)
 4. Shape of the bore and/or outside diameter of bearing - spherical, tapered or cylindrical

- Fourth - RECORD - additional relevant information.
 - The more information available, the easier it will be to identify the replacement bearing needed. Record:
 1. Unique features such as lubrication holes, snap ring grooves, machined shoulders, etc.
 2. Application/equipment data
