Helical Bevel Speed Reducers

Torque Arm Mounted, NEMA Quill Input, Right Angle, Hollow Bore Output

The WorldWide Electric "KAN" Series Helical and Bevel Speed Reducers deliver a broad range of power and output torque to support a wide array of applications. The "KAN" Series standard NEMA quill input design simplifies the task of retrofitting – just use an off-the shelf C-face motor and resume operation. No more serial number requirements for ordering costly proprietary motors with long lead times!
